5G Radiation Scientific Studies

This page is for the serious students of RF Radiation, and specifically 5G RF Radiation. If you really want to know the facts (i.e. what the peer reviewed scientific studies say), then this page will be a great resource for you. Don't be afraid to click on links and actually read the studies. It can seem daunting at first, but you will quickly get the hang of it. Even with their scientific jargon they are pretty simple to understand.

I like to first read what is called the "Abstract" and "Conclusion" portions of the study. This gives me an overview of the study and its findings. Then I go through and dig deeper reading the actual study so I can get a feel for how they performed their experiments.

Below we link to many real peer-reviewed scientific studies that have been done on RF Radiation, as well as many letters on this topic written to government entities by doctors and scientists from around the world. The below video is kind of an introduction to this page, and will highlight briefly the information available on this page.

5G Frequencies

2G, 3G & 4G cell phone & WiFi technologies transmit using frequencies between about 800 MHz and 6 GHz. The 5G (fifth generation) technology is said to use frequencies between about 24 GHz and possibly up to 300 GHz. These are frequencies in the "non-ionizing" portion of the electromagnetic spectrum.

An expert by the name of Kevin Mottus from the US Brain Tumor Association has said that within these "non-ionizing" portions of the electromagnetic spectrum, the higher the frequency the more dangerous it is to living organisms.

5G Studies And Information:

In this section I link to 5G related scientific studies and letters. These are really powerful and I recommend a thorough reading of each. On the link that says "Letters From 250

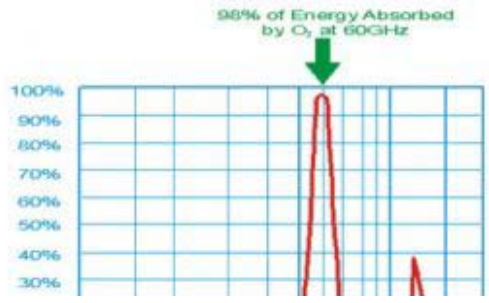

Scientists…" there are literally letters from that many scientists. And again I recommend reading them.

If in your personal studies you find any 5G related peer reviewed scientific studies (or letter/video) that you feel should be added to this page, please go to this video (https://youtu.be/eMWJEr-bbQA) and post a comment on that video with a link to the study. I will review it and if it relates well to this topic then I will add it to this page.

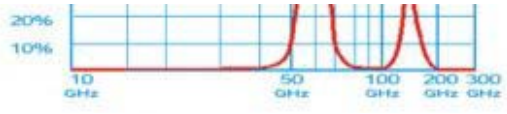

Here are the letters and studies:

- Is 5G Harmful to Our Health?

5G's 60 GHz Frequency Oxygen Absorption

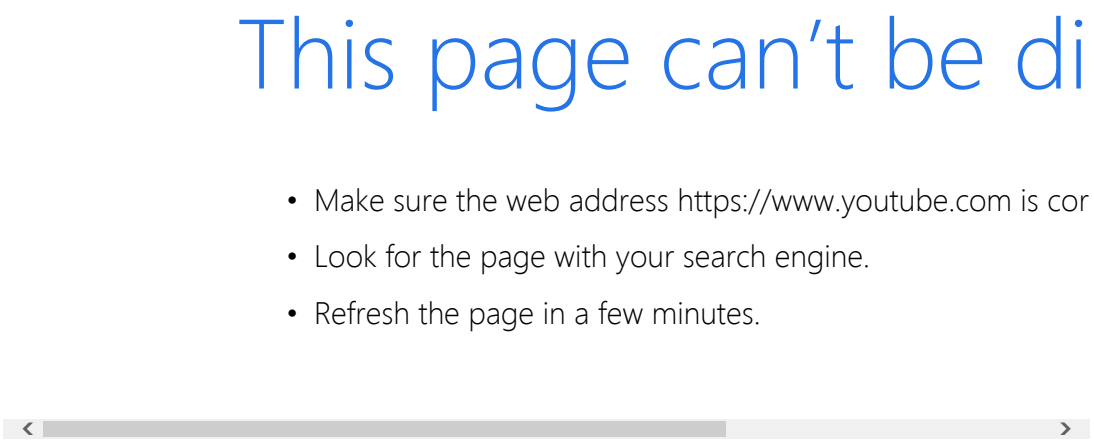

60 GHz RF Frequency is a common one used in 5G, such as by WiFi routers, and pretty soon cell phones. Because of its oxygen absorption characteristics, a major concern people have about the 60 GHz frequency is

that it may interfere with a person's ability to absorb oxygen in the lungs. 60 GHz frequency affects the orbit of electrons in the oxygen molecule, and this affects the oxygen molecule's ability to bind with blood hemoglobin. Here are some articles and a video that talk about the 60 GHz frequency's oxygen absorption.

- Fixed Wireless Communications at 60GHz Unique Oxygen Absorption Properties
- The Benefits of 60 GHz Unlicensed Wireless Communications
- Why is the 60 GHz Band not good for long-range communications?

Interesting 5G Analysis

This is an interesting detailed analysis of Covid-19, how it came to be, and if and how it relates to or is affected by the 5G technology. It is worth a thorough read.

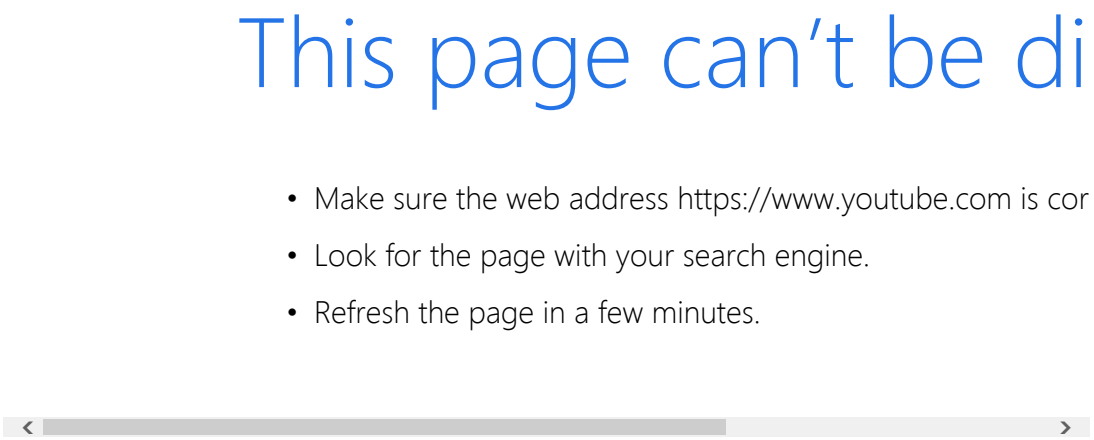

- Covid-19/5G Analasys – See 5G Section Page 21

British Physicist Barrie Trower On 5G

Now these are very important videos on 5G to watch. They are both about an hour and a half long, but well worth watching if you are interested in this topic. Barrie Trower is an expert in this field. He is a physicist who spent his whole career (beginning in the military) studying this kind of radiation in all its forms and uses. He saw it used both as military weapons and in communication. It is a very excellent video on this topic. (See Barrie Trower's paper on the bees and microwave radiation.)

95 GHz Microwave (Millimeter Wave) U.S. Military Crowd Control Weapon

Below is an article about the US Military's microwave crowd control weapon called the "Active Denial System". It disperses crowds by heating up their skins. This weapon operates using 95 GHz, which is a frequency within the 5G range. This is a great example of the power to harm that these 5G frequencies have.

- US Military – Active Denial System

General RF Radiation Studies & Information:

In this section I link to peer reviewed scientific studies that focused on lower frequencies used for cell phone, wireless and WiFi devices. These were the 1G, 2G, 3G & 4G (G stands for the word “Generation”) that use between 800 MHz to 6 GHz.

As a point of reference the typical microwave oven uses the 2.45 GHz RF Radiation frequency to cook food. All Bluetooth devices use this same 2.45 GHz frequency.

Here are the studies:

- Cellphone Brain Tumor Risk, Brain Tumours: Rise in Glioblastoma Multiforme & Aggressive Brain Tumors Tell a Story show potential increase in brain tumors in the temporal lobe.
- Breast Cancer & Cellular Phones
- The below video shows a young woman who carried her cell phone in one particular side of her bra for four years. Then she was diagnosed with breast cancer in that exact spot where she always put her cell phone. Dr Oz as well as another medical doctor give their opinion about her story in the video as well. It is very interesting to watch. I highly recommend watching it.

British Physicist Barrie Trower Discusses How RF (Microwave) Radiation Causes Crib Death & DNA Damage In Infants & Fetuses:

Here is another video interview of Barrie Trower, the same physicist microwave radiation expert I talked about above. In this video he starts out by going over his career and credentials. And then at about the 6 minute mark in the video he gets into the specific health problems (such as crib death and DNA damage) he has witnessed personally in his career. Another very informative video.

Aulterra Global Studies – Reducing The Effects Of Radiation:

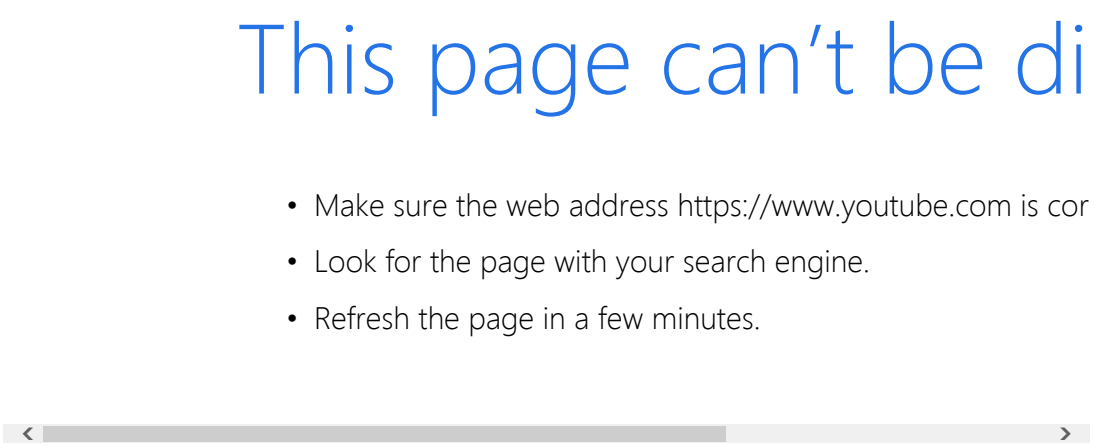

In this section I include peer reviewed scientific studies performed regarding a specific product that helps protect living organisms from the harmful effects of this kind of radiation. This is the only product I have found that has real scientific studies proving that their products do what they claim they do. I list these studies below for you to read and consider for yourself.

- Quantum Biology In-Vitro Reduce EMF
- Aulterra Human DNA Mitigation 6
- Aulterra Rare Earth Element Enriched Mineral 3
- Aulterra Reduced Intensity of Cell Phone Radiation 7
- Aulterra Reducing the In Vitro Electromagnetic Field Effect 5
- Aulterra Reverse the Harmful Effects of Electromagnetic Fields 8
- See also Aulterra.com

The below is a video of a man getting a blood test done two different ways as a comparison. The first was done after him talking on his cellphone. And then the second test was done after him talking on the cellphone with the Aulterra Neutralizer Stickers on his cellphone.

This particular type of test is very credible to me personally. Several decades ago I was experiencing some very strange health problems that my doctors were not able to diagnose. I went to 6 different specialists and nobody was able to figure out what was wrong. Then one performed the simple blood test shown in the below video and diagnosed and solved my problem on the spot.

ABOUT US

Hi! I'm David. Several years ago I read an article about the harmful effects caused by RF Radiation. This led me to an in-depth study of the subject. As I read the findings of many scientific studies I was flabbergasted that more people did not know about this. I bought some meters and began testing my own house and then researching ways to correct the issues I found. This website grew out of that research. Now it is one of the most trusted sources to learn about RF Radiation.
