State: Utah

Name: Rosemarie Russell

Occupation: My name is Rosemarie Russell. My occupation is Paralegal.

Wireless Health Effects: Wireless technology affects my health causing head pain, dizziness, nausea, insomnia, concentrate difficulty, chest pains, rapid heartbeat, tinnitus, and asthma.

Wireless technology has affected my life: Wireless technology has affected my life because I can't travel, I can't stay in hotels, I can't go to restaurants, concerts, movies, airports, etc. I can't go to a hospital, a doctor, dentist, or library. I can no longer participate in meetings or, community service activities. I cannot enjoy my property because I have to stay inside. I have spent tens of thousands of dollars to shield my home and remediate EMF. Social activities are also very difficult. I must shop for food but I need a day trying to recover after a short shopping trip. I have to take medications and supplements that are not covered by insurance.

Concerns for 5G: My concerns about the future are survival, the cost of health care and losing my ability to take care of my home and spouse. I am afraid I will not be able to continue working.
